VCL Assignment

Develop a demo college login web page using MERN Stack (or any other framework as per comfort)

1. Create a login page that has two by default users: Student and Staff. (any name/password can be used as credentials)
2. For Student web page – a student should be able to login and enter his personal details like name, email, contact number and upload his resume in PDF format only.
3. For Staff web page – the staff should be able to login and check upload history that consists of details of the students, date and time of upload, view and download options for resume (in tabular format).

Instructions:

- We would encourage you to select your UI tool kit, layouts, loading indicators, and card templates, etc.
- Show innovation in creating a more interactive web page with the given scenario.

Submission

- This task should be **completed within 3 days** and should be uploaded on GitHub. The link to GitHub should be shared on Email: **people@valiantcom.com**
- Attach a .zip folder containing all the screenshots of the result output (screens and database).
